## SSR80

Max 3000 Lumens rechargeable flashlight with an extra super bright LED in red/green/blue, and functions specially as a 7800mAh portable power bank!

**Output:** 3000 lumens

**Light source:** 3\*XM-L2 + 1\*MC-E

**Intensity:** 74500cd

**Beam Distance:** 650m

**Battery:** battery package of 7.4V and 7800mAh

**Switch:** dual side switches

**Working voltage range:** 6-8.4V

**New** Launching in July Finally!

## BC25SE

BC25 XM-L2 upgraded version

New circuit design achieves higher light efficiency, higher output and further throw

1. Use the latest XM-L2 (XM-L2 T6) LED with lifespan of 50,000 hours
2. Rotating bezel for easy switch between two modes which can be used in different environment
3. The efficient digital current-constant circuit achieves long runtime up to 7 hours
4. The latest "Crystal Coating Technology" along with "Precision Digital Technology" provides extreme reflector performance of 300m beam distance
5. Low power indicator function reminds user to change battery in time

- **Standard accessories:** O-rings, lanyard, tail rubber root, clip, tactical ring
- **Optional accessories:** 18650 battery, GM03, long teeth bezel, pouch, MG20 (silicon grease), I2、I4 Charger

## DDR30

JETBeam DD series (digital display) are the world's first digital display LED flashlights with high lumens. With the digital display function, the users can get the output level and remaining power clearly at any time to change battery in-time. The side switch also makes it really easy operation. Along with three output levels (high-mid-low) and strobe, the DD lights are popular as the most reliable partner for outdoor illumination.

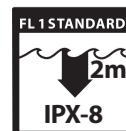

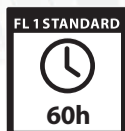

1. Max output of 3300 lumens and runtime of 60 hours with 3 latest Cree XM-L2 LED
2. Battery: 3x18650 (rechargeable)
3. Innovative charging design (direct charge or use car charger)
4. Waterproof to IPX-8

- **Standard accessories:** O-rings, lanyard, car charger
- **Optional accessories:** 18650 battery, MG20 (silicon grease), adapter (output 15VDC 1.5A, input compatible with different plugs), I2、I4 Charger, pouch

### The Hunter

--Rechargeable side-controlled digital display flashlight of 1000 lumens!

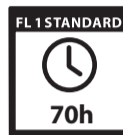

1. Max output of 1000 lumens and runtime of 70 hours with 1 latest Cree XM-L2 LED
2. Batteries: 1x18650 (rechargeable) / 2xCR123A (non-rechargeable)
3. USB charging design
4. Waterproof to IPX-8

- **Standard accessories:** O-rings, lanyard, USB charging cable
- **Optional accessories:** 18650 battery, attacking cone, GM03, MG20 (silicon grease), I2、I4 Charger

## SRA40

### The First Rechargeable Flashlight of 4\*AA!

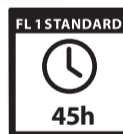

1. Lightweight design with aircraft grade aluminum alloy
2. Max output of 960 lumens and runtime of 45 hours with the latest Cree XM-L2 LED powered by 4xAA
3. Creative intelligent charging function (flashlight can be charged with full voltage charger when powered by 1.2V rechargeable battery)
4. Innovative dual switches design for rapid access to 3 different outputs, strobe and SOS
5. Power indicator function shows power status clearly
6. Waterproof to IPX-8 (2 meters under water)

- **Standard accessories:** O-rings, lanyard, charging adapter
- **Optional accessories:** attacking cone, MG20 (silicon grease), I2、I4 Charger

## SSR50

### A 1000 lumens rechargeable flashlight and 7500mAh portable power bank!

1. Adopt the 7500mAh vehicle-mounted lithium rechargeable battery of manganate power
2. Home charging function
3. Portable power bank function

- **Standard accessories:** O-rings, lanyard, charging adapter
- **Optional accessories:** MG20(silicon grease)

## RRT26

Latest magnetic invariable brightness adjustment and multi-purposed tactical application.

1. Rapid brightness/function selection by rotating a Rapid Control Ring
2. Premium Cree XM-L2 T6 LED with max output up to 980 lumens
3. Born with red/green/blue lights for tactical and signaling
4. Infinite brightness adjustment from 0 to 980 lumens and seven special functions available
5. Battery: 1x18650 or 2xCR123A/RCR123A

- **Standard accessories:** lanyard, O-rings, tactical ring, tail cap, quality holster
- **Optional accessories:** 18650 battery, RCR123 battery, attacking cone, GM03, RM06, TTS01, I2、I4 Charger

## RRT0

JETBeam RRT series (Rapid Response Tactical) adopt unique magnetic ring design. By rotating the magnetic ring, you can get all functions rapidly including different output levels, strobe and etc. JETBeam RRT series are competent for high-end illumination needs of military, law enforcement, military defense and etc.

1. Max output of 650 lumens and runtime of 100 hours with the latest Cree XM-L2 LED powered by 1x(R)CR123 battery. With an AA extender, you can use one AA battery for cost down
2. Battery: 1x(R)CR123/1xCR123A/1xAA
3. Use the latest magnetic technology for easy access to different output levels and strobe by rotating the smart ring. The stainless steel smart ring is very durable and reliable
4. Specially designed for military, law enforcement and self-defense
5. Waterproof to IPX-8

- **Standard accessories:** O-rings, lanyard, tailcap, clip, AA extender
- **Optional accessories:** pouch, GM03, MG20(silicon grease), I2、I4 Charger

## 3M

JETBeam M series (Military lighting) are of exquisite workmanship. They are specially designed for military illumination with classic style of strong and durable configuration. The pressure-resistant, shockproof, waterproof and multiple modes design achieve perfect military style.

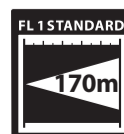

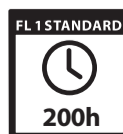

1. Max output of 560 lumens and runtime of up to 200 hours with the latest Cree XM-L2 LED
2. Battery: 2xCR123(RCR123)/1x18650 rechargeable lithium battery
3. Intuitive user interface allows rapid switching between two modes, user-defined mode allows customized brightness levels and multitude of functions
4. Stainless steel crenulated bezel effectively protects against impacts

- **Standard accessories:** O-rings, lanyard, tailcap, clip
- **Optional accessories:** pouch, 18650 battery, GM02, GM03, TTS01, RM06, MG20(silicon grease), I2、I4 Charger

# General use

## SSC20

JTEBeam SS series (dual side-switch) adopt a very convenient and easy dimming system with a round side switch and a triangle side switch. The triangle side switch achieves very easy recognition even in dark due to the special shape. SS series use Cree G2 LED with multiple functions including three levels of brightness, strobe, low power warning and etc. Along with the unique rotatable clip and IPX-8 waterproof, JETBeam SS series can be your best choice for outdoor sports.

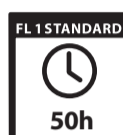

1. Max output of 580 lumens and runtime of 50 hours with Cree G2 LED
2. Battery: 1x18650/2xCR123A
3. The most convenient dual side switches design (⊕ for on/off, ▲ for different mode) with three output levels, strobe and intelligent memory function
4. Low power warning function
5. Waterproof to IPX-8

- **Standard accessories:** O-rings, lanyard, clip
- **Optional accessories:** 18650 battery, attacking cone, MG20 (silicon grease), I2、I4 Charger

## PA10

JETBeam P series (High-Performance) adopt high brightness, high-performance and tactical tail switch design. The light can be on/off and access to different mode easily with tail switch. Along with outstanding anti-roll, anti-skid and waterproof design, JETBeam P series are excellent companions for outdoor tour, exploration, hiking, climbing, cycling, camping and etc.

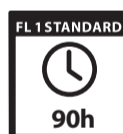

1. Max output of up to 650 lumens and runtime of 90 hours with Cree T6 LED powered by 1xAA
2. Battery: 1x14500 lithium rechargeable battery/1AA
3. Intuitive user interface allows rapid switching between two modes; user-defined mode allows customized brightness levels and multitude of functions
4. Reverse polarity protection function
5. Waterproof to IPX-8

- **Standard accessories:** O-rings, lanyard, clip, tail cap
- **Optional accessories:** GM03, MG20(silicon grease), I2、I4 Charger

## RRT01

An Extra compact but powerful outdoor lamp with rapid infinite brightness adjustment!

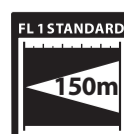

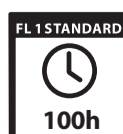

1. Rapid power-on and brightness adjustment by rotating the RRT magnetic ring
2. Stainless steel bezel protect the key parts against external impact
3. Durable stainless steel lanyard hole at tail
4. Custom-designed curved reflector for Cree LED improves reflective efficiency and focusing capability

- **Standard accessories:** O-ring, lanyard, clip
- **Optional accessories:** MG20(silicon grease)

1. 3 lamps in 1, and dynamic cycling brightness adjustment.
2. Rotary brightness selector ring enables 4 brightness levels, SOS, Patrolling and power indicator functions.
3. Car charging and AC charging at home are supported.
4. 3 stainless steel guard protection for core components.
5. Removable grip handle, more comfortable to hold by hand.

# Highend Flashlight User-defined Brightness Series

JA10 / JC10 are mini angle lamps of 1\*AA / 1\*CR123 with magnetic design at tail, along with the switch & brightness adjusting button on the top, lighting by the side, and self-defined brightness, they are portable and user-friendly gadgets for outdoor sports, travel, machinery repairing, etc.

1. Switch & brightness adjusting button on the top, and lighting by the side.
2. Magnetic design at tail, easily stick to any iron.
3. Can be fixed on backpack, belt or pocket when lighting by solid stainless pocket clip.
4. Memorable infinite brightness adjustment between 5-260 lumens, define your personal brightness.

# Headlamp

## HA30

HA30 is a full aluminum alloy outdoor headlamp processed with exquisite workmanship. Powered by constant current circuit with 3 AAA batteries and controlled by a magnet ring, it ensures you an easy-operating system. HA30 has 3 brightness levels and an SOS mode. The maximum output reaches 260 lumens while the minimum reaches 30 lumens. With its 1-9 hours runtime, 52g net weight and high durability, HA30 will be your reliable partner for hiking, camping, climbing, riding and fishing!

Cree XP-G2 LED
