

Personally for you

For many years we've been accumulating experience and thoroughly investigating the real requirements of the end-users who wanted to obtain a high-quality and reliable light. We speak about military officers and Special Forces, hunters and divers, rescuers and firemen, speleologists and bikers — all the enthusiastic and demanding people.

Now our product line consists of 30 models which are represented in 32 countries of the world, but in the nearest future there will be more than 40 models of flashlights and 12 kinds of original accessories, which altogether will cover every significant sphere.

Extremely robust

We decided to implement in our products only the best LEDs and cutting-edge electronics made in Japan and the USA to obtain revolutionary and unprecedented results.

You are able to throw almost all our flashlights from the 10th-floor height and submerge them at 50 meters.

Why? We've just put in such great margin of safety. 10 years no-hassle warranty.

We bust myths.

No more compromises.

Forget everything you've known about flashlights before.

What distinguishes us

Canadian manufacturer and own 6-floor factory.

Designed especially for your needs.

The team of scientists and engineers engaged in military and space industry.

The best and tried-and-true components by the USA and Japan.

Particular attention to durability and technologies, not only to external design.

Our Mission is to provide people with the most reliable and technically advanced light in the world.
