SEARCH LIGHTS

Barracuda v2

1450 lumens • 675 meters

Impressively bright light and 675 m beam distance

Extreme brightness 1450 lumens and unprecedented beam distance up to 675 meters for efficient illumination of large areas.

Unsurpassed reliability

Ultra-strong materials and thoroughly thought-out construction guarantees total protection from faulty operation, which can be caused by harsh impacts or vibrations. The flashlight withstands a fall from the 10th floor and even a direct shot.

Light-weight but durable construction

Due to extremely lightweight construction, the flashlight has minimal weight saving its excellent light characteristics and fail-proof reliability. It permits to use the flashlight during long foot-mobile searching and forced marches.

Simple operation and continuous runtimes

The flashlight has easy operation and 6 brightness modes. Advanced electronic driver enables to get record runtimes with two 18650 Li-Ion batteries – 1 hour 30 minutes at maximal mode 1450 lumen and 13 hours 40 minutes at middle mode 200 lumen.

Constant light brightness

Full stabilization - constant brightness even when the batteries are nearly empty and at -25°C temperature. You can be sure that even during continuous use light brightness will not decrease with time.
