—since—
2007 Armytek
Optoelectronics Inc.
Ontario, Canada

History of the Armytek Company

Let's start from the middle. Legally **Armytek Optoelectronics Inc.** was registered by Olga Khanoutin, the company's President, in the beginning of the 2010 in Ontario, **Canada**.

But everything began much earlier. Starting from **2007** we have taken part in more than 50 international exhibitions in different continents. Now our product line consists of **32 models** and **12 kinds** of original accessories which are represented in **52 countries** of the world, and in the nearest future **21 new models** of flashlights will be released, which altogether will cover every significant sphere. Our corporation has multiple patents worldwide.

And you are able to throw almost all our flashlights from **10th floor** height and submerge them at **50 meters**.

Why? We've just put in such great margin of safety. **10 year no-hassle warranty**.

We bust myths. No more compromises. Forget everything you've known about flashlights before.

So what distinguishes us from other companies?

- Canadian manufacturer and own factory.
- Designed especially for your needs.
- The team of scientists and engineers engaged in military and space industry.
- The best and tried-and-true components by the USA and Japan.
- Particular attention to durability and technologies, not only to external design.

Our Mission is to provide people with the most reliable and technically advanced light in the world.

How it was made?

We've got interested in LED lighting in 2007 and just like everyone – have become its active users because of its efficiency and convenience. But European and American companies that existed at that time at LED market

10 years

WARRANTY

offered expensive and conservative products, being behind the world progress for years though reliable. From the other hand, Chinese manufacturers were producing beautiful and modern products at reasonable cost, but they were technologically “crude” at many aspects, as for them the outer varnish and repeat sales are much more valuable than quality and durability for years. They usually copied the look of the product using the domestic components and stated the same characteristics as in the prototype, but it was cheaper and nicer. That was a problem. We solve problems without doubts.

The most interesting part began.

1 We have gathered an international group of developers from Canada and Europe.

It consists of the best scientists, engineers and designers from military, aircraft and space industry. They are working hard to create the most innovative and technically advanced flashlights in the world. It's amazing that secret military technologies can uncompromisingly serve the humanity.

In fact only such people can find the presumptive problems in the design, optics, electronics and power supplies. Wherever and whenever. Our engineers never agree to compromises and are aimed to refine every detail, find the best material – and they can do it due to the great experience and invariable intention to reach perfection.

2 For many years we've been accumulating experience and thoroughly investigating the real requirements of the final customers who wanted to get a high-quality and reliable light.

We speak about military officers and Special Forces, hunters and divers, rescuers and firemen, speleologists and bikers - all the enthusiastic and demanding people.

As the users of LED lights – we are not interested in the “dry” list of unnecessary options which the manufacturers consider meaningful. The product we need has to fit our real-world requirements and embrace the features that are valuable and unique especially for us.

more than
50
international
exhibitions
— ★ ★ ★ —

- 3** To create reliable lighting products we completely refused to apply Chinese components from the domestic market i.e. cheap analogs of well-known brands.

We decided to implement in our products only the best LEDs and cutting-edge electronics made in Japan and the USA to obtain the revolutionary and unprecedented results.

We've created our first tactical flashlight "Predator" from the ground up, and it has compiled a plenty of innovative solutions (in which at the beginning many people even refused to believe). Leaping ahead we may say that Chinese manufacturers haven't even been able to replicate our technologies using cheap components so they've just copied its names without real implementing in the products (e.g. Firefly Technology). Meanwhile we started the hard tests of Predator in severe conditions of torrid USA deserts and frosts of north Canada.

- 4** In 2009 we have made a strategically right decision to open our own factory in China.

It was made to enable us to provide our customers all over the world with robust and submersible high-tech flashlights at the best prices and in the shortest time. The great characteristics of our lights are for years confirmed by the reviewers' measurement, opinions of real users and positive feedbacks of Special Forces.

Nowadays our manufacture is a factory containing all the modern production facilities, high-end equipment, ultra reliable materials and special system of quality-control.

REPRESENTED IN
52
COUNTRIES

- 5** Our name "Armytek" wasn't chosen accidentally. It's the reflection of the main idea: the army requirements to the reliability of our products and the latest world technologies in use.

Here's an amazing fact – when we use the most advanced technologies on the edge of possibilities we discover the real engineers' art – to find the ideal solution that will give the highest possible features, valuable to each customer group.

Branches of our corporation are scattered all over the world. This is because a small group of professionals turned into a solid team of likeminded people, active and ambitious. We are totally sure in the result we reach and are really interested in the thing we do for you.

These advantages that distinguish us from our competitors enabled us to enter the new stage in the development and take a worthy place at the LED lighting market.

We successfully maintain the sale of our products made with advanced technologies. For the past few years we've established contacts with clients from more than 52 countries. Armytek bases the partnership upon trust and tries to satisfy the most daring requirements of its customers. Constant and continuous feedback enables us to react fast to the customers' needs and improve our products each time overriding ourselves.

Our team is totally goal-oriented, that allows us to look forward straightly and confidently and not only to keep pace with the time, but to move ahead, setting the trend.

Multi-flashlights

NEW electronics, optics
and construction!

Multi-flashlights

Wizard PRO Magnet USB

MULTI-FLASHLIGHT

Modes: 11 • Length: 110 mm • Head: 29 mm • Body: 24.5 mm • Weight: 65 g

LED Cree XHP50
White or warm light

2300 lumens
1x18650 Li-Ion

130 meters

What's included:

- 1 - clip
- 2 - plastic holder
- 3 - magnet USB charger
- 4 - 2 spare O-rings
- 5 - handband
- 6 - 18650 Li-Ion battery
- 7 - headband

Extreme light brightness

The use of unique electronics enabled us to create the world's first headlamp with 2300 LED lm brightness, which remains constant during the whole operation time of the flashlight.

USB-rechargeable, but IP68 waterproof and dustproof

Made of aircraft-grade aluminum using the Slim Profile Technology in combination with functional ergonomic design. Guaranteed durability – stands up harsh impacts and falling from 10 meters height. The flashlight can work for more than 2 hours at 10 meters depth.

Efficient TIR-optics

The most efficient TIR-optics provides even wide light at the distance up to 130 meters and perfectly suits for either close application or a huge area illumination. Continuous use without an effect of "tunnel vision".

Reliable mount & comfortable operation

Comfortable headband for reliable fixation of the flashlight – it won't slip even while you're running. Side switch and the function of quick access to the main modes guarantees a simple one-hand operation. The flashlight won't shift or slide down from the head.

Designed for at least 10 applications

Multi-flashlights "10 in 1": car, fishing, hunting, home, work, city, picnic, bike, outdoor, travel. Removable clip and magnet in the tailcap, strong lanyard, convenient headband and possibility of tail-stand for comfortable multipurpose use.

Efficient TIR-optics & constant bright light

Wide light without sharp edges due to TIR-optics. No "tunnel vision" effect after continuous use. Flat Runtime Technology for constant brightness even in -25°C or with almost discharged batteries.

Low battery indication

Multicolor Warning Indication provides information about low battery level and high temperature. Multicolor State Indication and ultra low current drain in OFF-state is more than 25 years.

- 1 - holster
- 2 - lanyard
- 3 - clip
- 4 - rubber grip
- 5 - 2 rubber rings
- 6 - rubber button
- 7 - 2 spare O-rings

Extreme beam distance

Due to Long-Range Optics Technology even with a compact-size reflector your target is detectable at 451 meters distance. Distinct hotspot and minimal spill guarantee directed aim illumination. New XHP35 HI LED provides impressive brightness 1700 lumens.

Constant ultra bright Light

Due to FLAT Runtime Technology the brightness remains constant even in -25°C frost or with almost discharged batteries. Even in Maximal mode the brightness is the same for the whole operation time.

Designed for weapon mounting

Standard 1" body diameter matches up with most weapon mounts. Reliable body, red/green/blue filters and original remote switches for comfortable Hunting and secure Military application. No failures while shooting.

Light-weight, durable & waterproof

Made of aircraft-grade aluminium using the Slim Profile Technology. Guaranteed durability — stands up the recoil of any gun gauge and falling from 30 meters height. The flashlight works for more than 5 hours at 50 meters depth.

- 5 - 2 rubber rings
- 6 - rubber button
- 7 - 2 spare O-rings

Extreme beam distance

Due to Long-Range Optics Technology the target is detectable at 395 meters distance. Distinct hotspot guarantees perfect illumination of distance up to a required object. Focused narrow light with impressive brightness 1700 lumens for precise aiming.

Highly reliable

The highest standards of durability: solid-state construction and efficient protection of internal components guarantee no-break work of the flashlight - it stands up to recoil of 12 gauge shotgun and falling from 30 meters.

Easy to carry and operate

Compact size and light weight for using on the weapon. Steel bezel protect the glass from fallings and impacts. Several brightness modes for multipurpose use in different situations and simple user-interface for comfortable one-hand operation of the flashlight.

Designed for weapon mounting

Standard 1" body diameter matches up with most weapon mounts. Underbarrel flashlight with reliable body and original remote switches for comfortable Hunting and secure Military application.

Impressive brightness & efficient TIR-optics

Compact and bright flashlights with TIR-optics for smooth light beam without sharp edges. Distinct hotspot and wide spill guarantee perfect territory illumination and precise aiming.

Designed for weapon mounting

Standard 1" body diameter matches up with most weapon mounts. Reliable body and original remote switches for comfortable Hunting and secure Military application.

Durable & waterproof

Made of aircraft-grade aluminum using the Slim Profile Technology in combination with functional ergonomic design. Guaranteed durability – stands up the recoil of 12 gauge shotgun, harsh impacts, vibrations and falling from 10 meters height. The flashlight works for 2.5 hours at 10 meters depth.

- 6 - clip
- 7 - rubber grip
- 8 - 2 rubber rings

Impressively bright light & 800 m beam distance

Extreme brightness 1850 lumens and unprecedented beam distance up to 800 meters for efficient illumination of large areas. Full brightness stabilization - you can be sure that even during continuous use light brightness will not decrease with time.

Unsurpassed reliability

Ultra-strong materials and thoroughly thought-out construction guarantees total protection from faulty operation, which can be caused by harsh impacts or vibrations. The flashlight withstands a fall from the 10th floor and even a direct shot.

Light-weight but durable construction

Due to extremely lightweight construction, the flashlight has minimal weight saving its excellent light characteristics and fail-proof reliability. It permits to use the flashlight during long foot-mobile searching and forced marches.

Up to 500 days of light

Record runtime with 2x18650 Li-Ion batteries due to the Firefly technology. Compatible with rechargeable 18650 Li-Ion, R123 Li-Ion and non-rechargeable CR123A batteries.

775 meters

Impressively bright light & 775 m beam distance

Extreme brightness 1350 lumens and unprecedented beam distance up to 775 meters for efficient illumination of large areas. Constant brightness even when the batteries are nearly empty or at -25°C temperature.

Unsurpassed reliability

Ultra-strong materials and thoroughly thought-out construction guarantees total protection from faulty operation, which can be caused by harsh impacts or vibrations. The flashlight withstands a fall from the 10^m floor and even a direct shot.

Light-weight but durable construction

Due to extremely lightweight construction, the flashlight has minimal weight saving its excellent light characteristics and fail-proof reliability. It permits to use the flashlight during long foot-mobile searching and forced marches.

Simple operation & continuous runtimes

The flashlight has easy operation and 6 brightness modes. Advanced electronic driver enables to get record runtimes with two 18650 Li-Ion batteries – 1 hour 40 minutes at maximal mode 1450 lumen and 17 hours at middle mode 170 lumen.

- 3 - 2 spare O-rings
- 4 - lanyard
- 5 - lanyard ring
- 6 - magnet

Impressive brightness and special TIR-optics

Incredible light brightness 1200 lumens and beam distance up to 188 meters. TIR-optics provides not only comfortable wide light, but also suits for distant application. What is more, you won't have an effect of «tunnel vision» even after continuous use.

Durable reliable body & absolute water resistance

Ultra protection from scratches, harsh impacts and fallings from 10 meter height. Total water resistance, which completely protects the flashlight from rain, dirt and dust penetration. Water won't leak into the flashlight even during submersion to the depth of 10 meters.

Compact and light-weight

Compact size and small weight of flashlights with such brightness are perfect for constant carrying in the bag, pocket or on the belt. The flashlight won't burden you or create additional weight. You can put it into the pocket or fix on your clothes with the help of a removable clip.

Low battery indication

Multicolor Warning Indication provides information about low battery level and high temperature. Multicolor State Indication and ultra low current drain in OFF-state is more than 25 years.

Armytek Weapon Mounts

AWM-01

- 2 mounts in the set
- Diameter range:
8 – 23.5 mm and
10.5 – 26 mm*
- For flashlights with
the head diameter
up to 42 mm

AWM-02

- Diameter range:
19.5 – 35 mm*
- For flashlights with
the head diameter up
to 64 mm

- For mounting on shotguns and rifles
- Made of durable steel for maximal reliability
- Heat-resistant silicone inside to avoid scratching
and flashlight falling caused by recoil
- Extended screws for mounting on barrel of larger diameter
- Thoroughly designed construction for mounting on almost
all types of weapons, including side-by-side and over and
under double barrels

Remote Switch

for Armytek Flashlights

Compatible with:

- Barracuda / Barracuda Pro
- Predator / Predator Pro
- Viking / Viking Pro
- Dobermann / Dobermann Pro
- Partner C2/C4 or Partner C2/C4 Pro

Specially designed remote switch with curl cord allows you to use your flashlight with most types of weapon. The length of cord can vary from 25 to 70 cm.

**NEW** electronics, optics
and construction!

Color filters & Diffusers

Filters for flashlights are developed and designed to extend the opportunities of usage and in fact make your device multifunctional and more efficient.

Compatible with:

- Predator / Predator Pro
- Viking / Viking Pro

Green Filters are used mostly in hunting and tactics. Green light doesn't frighten animals and its beam can't be seen from aside so it makes impossible to disclose your location.

Red Filter is good for reading maps and navigating. It doesn't disturb night vision and can be used as signal light. Has the same features as the green filter.

Blue Filter is the best for navigating and reading because you can better distinguish lines and marks in blue light. Can also be used with night vision equipment.

White Diffuser for flashlights converts the focused light into a flood beam. Wider beam angle is better for close-distance applications as reading, lightening a tent or a small room, car repair and so on. The beam covers larger area and provides clear and comfortable lighting.

Grease

NyoGel 760G

Multipurpose silicone grease for lubrication and protection of electrical contacts and connections. Ideal for flashlights' threads and O-rings.

- Thick and dense, doesn't flow under its own weight
- High thermal resistance (-40...+135°C)
- Doesn't dry out and is fully waterproof
- Doesn't dissolve in water and other liquids
- Reliably protects all parts of flashlight from wearing out

NEW electronics, optics
and construction!

Armytek 18650 Li-Ion batteries 3.7V *Rechargeable, protected*

2800 mAh • 3100 mAh • 3400 mAh

- **Made in Japan high-grade ICs (Seiko).**
They are notable for low power requirement and high reliability. It means you get more advanced device performance.
- **The best chemistry in the world - Panasonic (Japan).**
Stands out for high discharge rates and long life span.
- **Possibility to work even under heavy loading.**
You will appreciate high battery discharge rate – up to 7.5 Amperes. We use quadruple brand MOSFET's! You can use them in severe conditions – they won't let you down even if you give up.
- **Triple protection against short, over-discharge, over-charge.**
You get the power supply, which is totally protected from any damage and enjoy its maximal performance and improved voltage stability. Certainly you won't face battery failure.
- **304 Stainless steel plate reinforced bottom.**
This unique structural design provides better impact-resistance.

Armytek CR123A lithium battery *Non-rechargeable*

- Ideal for LED flashlights, photo equipment, cameras, optics and other high current digital devices
- PCT protection for safety
- 10 years – ultra long shelf life with low discharge
- Voltage 3.0V
- Capacity 1600 mAh

How to choose a flashlight easily

Our engineers and designers in **Armytek** thoroughly consider the application sphere for each flashlight model. That's why it's rather easy to select the most suitable variant for you. Just follow 3 simple steps and decide what flashlight is the best for you! Additionally you'll find some tables at the next pages that will make your choice even easier.

By the way, when choosing the flashlight remember, that all our flashlights are available with warm or white light. Warm light is better for distinguishing colors and applying in the conditions of rain and fog in comparison with white light, which is in its turn 7% brighter.

STEP 1

For what tasks do you need a flashlight?

STEP 2

What brightness & power source suit better?

STEP 3

Do you need a basic or advanced Pro-version?

Multi-flashlights

Fully aluminum and water-resistant solid body without long wires, weak rubber connectors and unnecessary boxes. Customized with TIR-optics with comfortable wide light. Go with reliable headbands for applying as headlamps.

Wizard Pro Magnet USB (2300 lumens / 130 meters) and **Wizard Magnet USB (1250 lumens / 119 meters)** are the most comfortable multi-flashlights powered by **1x18650** Li-Ion battery with Magnet USB charger and Li-Ion battery in set.

Tiara C1 Pro and **Tiara C1** are the most compact ones working on powerful lithium **CR123A** battery and that's why extremely bright – **800** lumens. Their beam distance reaches up to **93** meters.

Tiara A1 Pro and **Tiara A1** are the brightest flashlights with extreme beam distance up to **86** meters powered by very popular **AA** or powerful **14500** Li-Ion batteries. Their output reaches up to **600** lumens.

♦ For differences between Pro and Regular versions see the comparison charts at the next page

Every Day Carry Lights

All EDC flashlights have a removable clip, a holster and a robust lanyard for easy carry and application.

If you prefer to operate a flashlight with a tail tactical switch choose reliable tactical lights with TIR-optics – **Partner** models with different power sources: **1xAA, 2xAA, 1xCR123A, 1x18650, 2x18650**. You decide either you want to get availability of AA battery or better brightness on lithium 18650 / CR123A battery.

EDC flashlights with TIR-optics specially created for the lovers of side switch operation are **Prime Pro** and **Prime**.

Prime C2 Pro (2100 lumens / 192 meters) and **Prime C2** (1250 lumens / 174 meters) are powered by **1x18650** battery and create a perfect combination of a compact body with extreme power.

Prime C1 Pro and **Prime C1** are the smallest bright EDC lights working on **1xCR123A** battery for great output values – **800** lumens & prominent beam distance – **131** meters.

Prime A1 Pro and **Prime A1** powered by wide-spread **AA** batteries provide **600** lumens brightness and **115** meters beam distance.

Prime A2 Pro and **Prime A2** with **2xAA** batteries show the results of **850** lumens and **143** meters.

♦ *For differences between Pro and Regular versions see the comparasion charts at the next page*

Tactical flashlights

Far-throwing and robust flashlight submersible to 50 meters and impact-resistant to 30 meters.

For using with rifles: **Predator Pro** (1700 lumens / 451 meters) or **Predator** (1200 lumens / 437 meters).

For applying with shotguns: **Viking Pro** (2300 lumens / 286 meters) or **Viking** (1250 lumens / 366 meters).

Cost-effective choice for weapon application is **Dobermann Pro** with **1700** lumens and **395** meters throw or **Dobermann** with **381** meters of directed light and **1200** lumens brightness.

We offer far-throwing flashlights with **green** and **red** light based on **Dobermann** and **Predator** models. They don't frighten the game or reveal your location.

The best choice for applying with shotguns are **also compact tactical flashlights** with TIR-optics – **Partners**.

Partner C2 Pro (2100 lumens / 192 meters) and **Partner C2** (1250 lumens / 174 meters) are the best combination of size and power: working on **1x18650** they compile in themselves the compact body.

If you want to get the brightest of compact weapon lights choose **Partner C4 Pro** (2300 lumens / 215 meters) or **Partner C4** (1450 lumens / 193 meters) – with **2x18650** you get more power and brightness.

Partner C1 Pro and **Partner C1** are the smallest but bright tactical lights powered by **1xCR123A** battery: you get **800** lumens output & **131** meters throw with these small ones.

Partner A2 Pro and **Partner A2** work on **2xAA** batteries to achieve **850** lumens brightness and **143** meters beam distance.

Partner A1 Pro and **Partner A1** are compact-size bright flashlights powered by very popular **AA** batteries. They provide **600** lumens output and **115** meters throw.

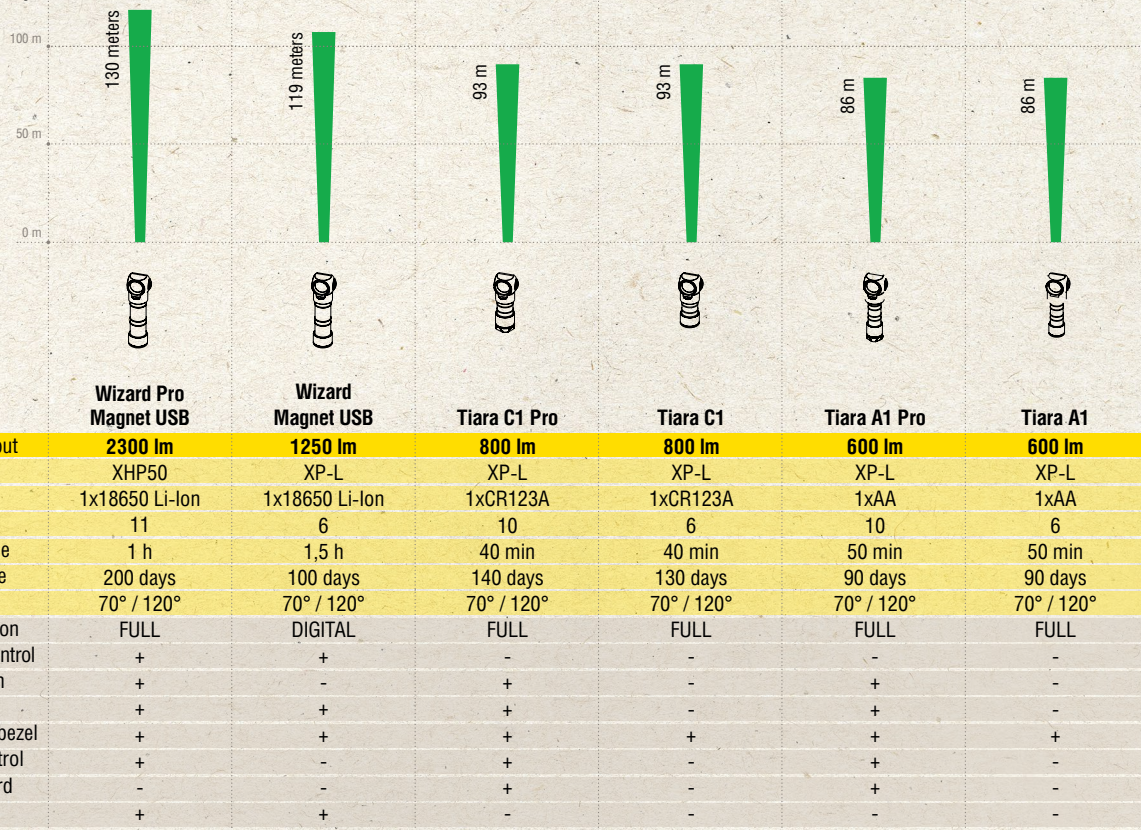

♦ *For differences between Pro and Regular versions see the comparasion charts at the next page*

Searchlights

The most powerful and throwing flashlights: **Barracuda Pro** (1850 lumens / 800 meters) and **Barracuda** (1350 lumens / 775 meters) powered by **2x18650** batteries offer amazing beam distance. There is also a possibility of attaching a remote switch and using these “monster-flashlights” at weapon.

♦ *For differences between Pro and Regular versions see the comparasion charts at the next page*
