LIGHTS

LIGHTS ARE ESSENTIAL WORK TOOLS

Why is it important to select the appropriate lighting solution?

► To improve comfort and ensure safety

- High quality LEDs without dark spots & areas for visual comfort
- Impact resistance and water resistance
- ATEX certified lights for hazardous work environments

► To facilitate interventions

- Handheld and hands-free solutions
- Choose an adapted light solution based on your needs for light intensity, beam distance, and run time

Circulate and move about safely

Long distance lighting

Close-up work

Light a wide work area

Optimize your light efficiency by choosing the right battery

ALKALINE: For everyday usage

LITHIUM: Recommended for outdoor (Performs in extreme temperatures from -40°C to 60°C) and for most powerful torches over 300 lumens

RECHARGEABLE: Recommended for frequent usage (daily or weekly basis)

WHAT ARE THE LIGHTS CHARACTERISTICS?

Lights performances are accredited by ANSI standards

The American National Standards Institute ensures products performances are all measured based on a common protocol to facilitate product comparison and consumer's choice.

► Luminous flux

The amount of light is expressed in LUMENS.

The more Lumens, the brighter the light will be.

The beam angle also has a direct effect on luminosity. As it widens, the intensity decreases.

Wide beam

Concentrated beam

► Beam distance

Projection distance of a light beam onto a surface.

Expressed in meters.

► Run time

How long a light can run until it offers 10% of the initial lumen output. Expressed in hours.

► Water resistance

Water resistance levels are measured in relation to IEC 60529 IPXX standards. Some **Energizer**® lights are IPX4 or IPX7 certified.

IPX4: Resist water splashing from any direction.

IPX7: Resist temporary water immersion. 30 minutes at 1 meter depth.

► Impact resistance

Expressed in meters.

After dropping in 6 different orientations, the lights retain all the performances established above.

How to select the appropriate lighting solution that meets your professional needs?

Tough, dependable and hardworking torches for professionals

ERGONOMIC

- Textured housing and ergonomic shape
- Large switch button

ADAPTABLE

- Adjustable light intensity
- Helmet solution

EXTREMELY ROBUST

- Water resistance: IPX4
- Sustains 7 meters drop test
- Rugged ABS plastic

What is ATEX^{Ex}

ATEX (ATmosphere EXplosive) is a European directive that requires to control the risk of Explosion in certain atmospheres. Areas where explosions may occur have to be identified and measures have to be taken to prevent these explosions.

Energizer[®] ATEX lights are suitable for:

- ▶ Every atmospheres where Gas and Vapors can cause an explosion (Zone 0, 1 & 2)

- ▶ Both product groups
Group 1: case specific to mines
Group 2: all surface industries

What are the characteristics of ATEX certified lights?

CE 0539 ^{Ex} I M 2 / II 1 / G / Ex / ia / I / IIC T4

- CE Authorized by the European: Committee for electrochemical standardization
- 0539 Marking certifying DEMKO / UL international quality control
- ^{Ex} Protection against explosions
- I M 2 Mine equipment, category M2: high protection
- II 1 Surface industry type equipment, category 1: very high protection
- G Suitable for gas and vapor type risk environments
- Ex Tested to the latest European: manufacturing standards
- ia Light material design ensuring maximum intrinsic safety
- I For use in Mines category 1
- IIC Product covering the acetylene and hydrogen gas class
- T4 Temperature class 4: resist up to 135°C

Energizer[®] Ultimate Lithium[™] Batteries are ATEX certified

Lithium AA & AAA batteries are certified as a component in intrinsic safety apparatus according to directive 94/9/EC ATEX. They can be used safely to power devices in hazardous environments

Daily professional use

ATEX^{Ex} Intrinsically safe torches for professionals in hazardous environments
