Usage and Maintenance

- Do not disassemble the sealed head as doing so may cause damage to the flashlight and will void the warranty.
- High-power flashlights need batteries capable of high current output. We strongly recommend use rechargeable batteries for their high performance.
- Remove the battery from the flashlight if you will not be using the light for an extended period.
- Replace the O-rings if they become stretched or damaged. Regularly lubricate the O-rings
- Clean the contacts of your light periodically.

There may be several reasons for a flickering or malfunctioning light.

Reason 1: The batteries need to be recharged or replaced.

Solution: Recharge or replace batteries

Reason 2: The PCB board contact or battery contacts are dirty. Solution:

Clean the contact points with an alcohol soaked cotton swab.

If the above methods do not solve the issue, please contact your distributor and refer to the warranty policy.
